Description of our Company	:	ALM Steel Building Technology Ltd. have started journey from 2001 which prefabricated steel structure system. Since then ALM Steel Building Technology Ltd has grown up to the present position as one of the leading company for pre-engineered building construction in Bangladesh. ALM provides complete design, planning & construction services for all types of steel building. To cope up with the rapid growth of price of steel, we have started looking for latest technology which can reduces the construction cost. Now ALM introduces "Truss Less Modular Building" as a Ready-made house to use in various sectors such as; low cost housing, ware house, work shop, recreation centre, industry, garage, storage, farm house, and army use etc. The product comes with amazing & catching features such as 25 years warranty & Do It Yourself (DIY) technology based on lasting value product with low cost facility. The ready-made buildings will be a quicker and durable solution for rural house and small businesses. One week is enough to delivery building at any location in the country by nominated trained erector team is also ready as per clients requirements. Its modular features will allowing to dismantle, transport and rebuild in any location again very easily.
